

Brightwater and Green Careers

Brightwater Goals:

- To provide all students with opportunities to be appreciative and responsive to nature, wildlife, land, water, air and one's place within the natural world
- To emphasize holistic reflection and self-awareness within the context of nature and ceremonies that honour the spiritual connection to the land of the First Peoples of Saskatchewan
- **To encourage the exploration of a wide variety of career paths, including entrepreneurship, through Brightwater experiences as they relate to the environment, economics and social justice**
- To demonstrate the collective valuing of sustainable use of natural resources for future generations and to help students understand the impact of human society on the natural environment, and demonstrate active sustainability through ethical resource use from Western and Indigenous perspectives
- To inspire and sustain ecological learning and other connections to the land through a wide variety of curricular experiences and Indigenous ways of knowing nature
