MEDIA SCHOOL ADVANTAGE

Media School is a dynamic, integrated program that helps Grade 11 students grow into independent learners in a caring community setting. Through various short film projects such as music videos, documentaries, and the 6 Roles Film, you will develop filmmaking skills such as writing, directing, editing, lighting, acting, costuming, makeup, and sound recording. Unique experiences in Media School include our semi-annual retreat where we make films and develop community and the Haunted House in first semester where students hone their production design, costuming, makeup, and acting skills. All of this is done in the Media School facility with no desks, no bells, and the freedom to explore learning.

DIVERSE COMMUNITY

Twenty students join together in a hands-on and real-world intensive education focused on authentic media production. Media School takes all kinds. If you are passionate about films (watching them and making them), writing, acting and directing, costuming, makeup, editing, and everything else related to film, then Media School may just be the program for you! We take top academic students and students who struggle in the traditional schooling model. We accept students who don't know what direction to point a camera, to students who are already YouTube famous. Your work in Media School will be seen across the nation.

EQUIPMENT

Media School provides top professional and semi-professional equipment. The same programs and technology used on the feature films currently in theatres are used by our students. Top audio recording and engineering software and equipment, the same cameras used on many television productions, professional grip and lighting equipment, and the supplies and software to create an extreme range of physical and CG effects are used by students to create their personal productions.

APPLICATION PROCESS

To apply to Media School, please fill out the unique programs application form available through your school's Student Services office or online on the Media School website.

HIGHLIGHTS
